EDUCATION

IIMT College of Engineering

Bachelor of Technology in Information Technology

Greater Noida, India

July 2021 – July 2025

EXPERIENCE

Software Engineer

Reospark Technology

July 2025 – August 2026

Noida, India

- Developed and maintained internal admin dashboards for multiple client projects using Django, Django REST Framework, and Next.js, giving client teams centralized tools to monitor operations and track KPIs
- Designed MySQL database schemas across client projects, structuring data models to support production workloads and multi-client isolation
- Owned end-to-end delivery on 3 client engagements — requirements gathering, feature development, and iteration based on direct client feedback — working across the full Python/Django and JavaScript/Next.js stack

Software Engineer Intern

Vomyra AI

January 2025 – June 2025

Noida, India

- Built and optimized real-time voice AI agents using Node.js, WebSockets, and FFmpeg, increasing streaming efficiency and streamlining transcription workflows for production deployment
- Integrated voice processing APIs and resolved latency bottlenecks in real-time streaming pipelines, collaborating across engineering and product teams
- Developed SEO-optimized frontend pages that improved site discoverability and user engagement metrics post-launch

PROJECTS

LinkFlow | *Next.js 15, Node.js, PostgreSQL, Prisma, Redis, BullMQ, Cloudinary, Stripe*

[Live](#)

- Currently building a production-grade multi-tenant SaaS link-in-bio platform as a monorepo with separate Next.js frontend and Express/TypeScript API, supporting isolated tenant data via PostgreSQL row-level design
- Engineered avatar upload pipeline using Multer, Streamifier, and Cloudinary with automatic deletion of stale assets; enforced 30-day username change lock with race condition handling via Prisma P2002 conflict resolution
- Integrated Redis for session caching, BullMQ for async job processing, and Stripe for subscription billing; instrumented full observability stack with Sentry, Prometheus, and Grafana

Clariv | *Next.js, Node.js, MongoDB, Google GenAI, OAuth, Tailwind CSS*

[Live](#)

- Built a full-stack document processing platform supporting PDF, DOCX, PPTX, and image uploads with automated content extraction and AI-powered summarization via Google GenAI API
- Implemented backend file parsing and tokenization pipeline with secure OAuth and JWT authentication; optimized SSR with Next.js for fast document insight delivery

Careerly | *Next.js, PostgreSQL, Prisma, Google Gemini API, Clerk*

[Live](#)

- Developed an AI-powered career platform delivering personalized resume generation, interview preparation, and industry insights using Google Gemini API
- Built scalable backend with PostgreSQL and Prisma ORM; implemented authentication with Clerk and structured feedback loops for performance improvement based on user inputs

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, ShadCN UI, Material UI

Backend: Node.js, Express.js, Django, DRF, RESTful APIs, WebSocket, Redis, BullMQ

Databases: PostgreSQL, MySQL, MongoDB, Firebase, Prisma ORM

Tools & Technologies: Git, Docker, Postman, Vercel, Cloudinary, Stripe, FFmpeg, Sentry, Prometheus

AI & APIs: Google Gemini API, Google GenAI, OAuth 2.0, JWT, API Integration
